### Section 4: First Aid Measures

---

---

**Eye Contact:** Immediately flush with plenty of water for 15 minutes. Get medical attention. Prompt action may save sight.

**Skin Contact:** Remove contaminated clothing and wash affected area with soap and water. Call a physician if irritation persists. Wash contaminated clothing prior to re-use.

**Inhalation:** Remove person to fresh air. Keep person calm. If not breathing, give artificial respiration. If breathing is difficult give oxygen. Call a physician.

**Ingestion:** Do not induce vomiting. Immediately give milk, egg white, antacid, gelatin, or, if none of these are available, give water. Get immediate medical attention.

---

### Section 5: Fire-Fighting Measures

---

---

**Flammable Properties:** As defined by OSHA, this product is nonflammable.

Flash Point:	None	Upper Explosive Limit:	None
Autoignition Temperature:	ND	Lower Explosive Limit:	None

**Fire and Explosion Data:**

**Suitable Extinguishing Media:** This material will not burn. Use water, CO2 or dry chemical as appropriate for surrounding fire.

**Products of Combustion:** Heated material may produce corrosive and irritating fumes.

**Explosion Hazards:** Containers, when exposed to heat from fire, may build pressure and rupture.

**Protection of Fire-Fighters:** Firefighters should wear self-contained, NIOSH-approved breathing apparatus for protection against suffocation and possible toxic decomposition products. Proper eye and skin protection should be provided. Use water spray to keep fire-exposed containers cool and to knock down vapors which may result from product decomposition.

---

---

### Section 6: Accidental Release Measures

---

---

**Personal Precautions:** Use personal protection recommended in Section 8.

**Environmental Precautions:** Take precautions to prevent contamination of ground and surface waters. Do not flush undiluted product into sewers or storm drains.

**Product Name: MARYKATE® On and Off Hull & Bottom Cleaner****Product Number (s): MK2032, MK20128, MK20550**

Methods for Containment & Clean-up: Dike area to contain spill. Ventilate the area with fresh air. If in confined space or limited air circulation area, clean-up workers should wear appropriate respiratory protection. Neutralize spilled material with sodium bicarbonate (baking soda) or sodium carbonate (baking powder, soda ash). Recover or absorb spilled material using an absorbent designed for chemical spills. Place used absorbents into proper waste containers.

**Section 7: Handling and Storage**

Handling Procedures: Keep containers closed when not in use. Do not mix with other chemical products. Use appropriate personal protective equipment (see Section 8) to prevent skin and eye contact. Avoid breathing vapors. For product use instructions, please see the product label.

Storage Procedures: Store in a cool dry area out of direct sunlight. Containers should be tightly closed while in storage. Do not store near alkaline materials. Keep out of reach of children.

Aerosol Storage Level: NA

**Section 8: Exposure Controls/Personal Protection****Exposure Guidelines:**

COMPONENT	OSHA		ACGIH		OTHER		UNIT
	TWA	STEL	TWA	STEL	TWA	SOURCE	
Hydrochloric acid	5 (c)	NE	2 (c)	NE	NE		ppm
Phosphoric acid	1	3 (v)	1	3	NE		mg/m <sup>3</sup>
Ethoxylated nonylphenol	NE	NE	NE	NE	NE		
Oxalic acid, dihydrate	NE	NE	NE	NE	NE		
Water	NE	NE	NE	NE	NE		
N.E. – Not Established      (c) – ceiling      (s) – skin      (v) – vacated							

**Controls and Protection:**

Engineering Controls: Area should have ventilation to provide fresh air. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at the source, preventing dispersion into the general work area. Use mechanical means if necessary to maintain vapor levels below the exposure guidelines. If working in a confined space, follow applicable OSHA regulations.

Respiratory Protection: None required for normal work where adequate ventilation is provided. If engineering controls are not feasible or if exposure exceeds the applicable exposure limits, use a NIOSH-approved cartridge respirator with acid gas cartridge. Air monitoring is needed to determine actual employee exposure levels. Use a self-contained breathing apparatus in confined spaces and for emergencies.

Eye/face Protection: For normal conditions, wear safety glasses. Where there is reasonable probability of liquid contact, wear splash-proof goggles.

Skin Protection: Use protective gloves such as latex or rubber. Also, use full protective clothing if there is prolonged or repeated contact of liquid with skin.
