

On & Off for Outdrives

OUTDRIVE AND LOWER UNIT CLEANER

WITH
SAFE ACID
TECHNOLOGY™

MARYKATE On & Off for Outdrives is specially formulated to clean painted aluminum outdrives, outboard lower units and propulsion components. This unique product utilizes Safe Acid Technology™ to effectively remove tough calcium and mineral deposits, scum lines, algae stains and other marine stains without harming the painted surface.

Regular use will help maintain a "like new" appearance and help prevent heavy deposits from forming. May also be used to clean outboard engine covers. Safe on fiberglass. Will not harm gel coat.

DIRECTIONS: Pour ON & OFF FOR OUTDRIVES into a plastic pail or container. Using a natural bristle paint brush, generously apply product to the area to be cleaned and allow to sit for 10-15 minutes. For excessive build-up, use a stiff brush to break up deposits. Hose or rinse off. See product label for warnings and complete instructions.
