CRC Dry Ceramic Lube

Advanced ceramic technology for cleaner, longer-lasting lubrication.

In clean environments, even a trace of oil or dust can disrupt sensors, halt production, or cause inspection failures. CRC Dry Ceramic Lube delivers clean, friction-free performance with a dry film that won't attract dirt, dust, fibers, residue or packaging debris. This micro-thin lubricant bonds to metal, rubber and plastic, reducing wear and remaining effective up to 450°F. Its ceramic solids stay stable where oils and greases break down.

Features & Benefits:

- **Advanced Ceramic Technology:** Provides outstanding lubrication and wear protection. Best for reducing friction on metal, wood, rubber, plastic, and glass.
- **Dry-Film Lubricating Barrier:** Reduces friction, sticking, and component wear without leaving behind an oily or greasy residue.
- **Non-Tacky Formula:** Does not attract dirt, dust, lint, or other contaminants that can accelerate wear and interfere with equipment performance.
- **Long-Lasting Ceramic Protection:** Creates a durable lubricating layer that continues protecting moving parts under demanding operating conditions, helping extend equipment life and reduce maintenance frequency.

Use On:

- Hinges
- Locks
- Catches
- Pulleys
- Conveyors
- Machine Parts
- Chutes & Slides
- Window Guides
- Drawers
- Rollers
