

# Food Grade New Look

## Perma-Lock® 2-Way Integrated Actuator

### Prevention. Not Detection®

All CRC Food Grade aerosols feature a precision-engineered no-slip actuator that holds the spray straw securely in place while offering two distinct spray patterns: wide spray in the “down” position and precision spray in the “up” position.

## Green Band | Product Name

A green band surrounds the entire product, guaranteeing visibility from any angle. A prominently displayed product name ensures immediate recognition of its designated purpose.

## QR CODE

The QR Code provides instant access to essential documentation, including allergen certs, NSF registration letters, and safety data sheets for each specific product.

## New Logo

The new CRC Food Grade logo makes recognition of products fast and easy. Positioned clearly in the front and center of the packaging makes each product quickly identifiable as part of the Food Grade line.

## New Can Design

A sleek, white dome-top can further differentiates food grade products from other MRO chemicals on the plant floor. An overall matte finish reduces glare for clear legibility.

## H1

All CRC Food Grade lubricants are registered as H1 with NSF, making them acceptable for use in areas that have incidental food contact. The NSF category code and registration number are prominently displayed to aid in the identification and inspection process.

TOGETHER, WE GET IT DONE.™
