

STA-LUBE® EXTREME PRESSURE ENGINE ASSEMBLY LUBE

Protect your engine during those crucial first few seconds of runtime.

This premium lithium 12 hydroxy stearate-based grease is designed to adhere to metal surfaces, creating a protective barrier that prevents destructive metal-to-metal contact. This lubricant helps protect engine parts when the engine is first put together and started, especially before the regular engine oil starts flowing properly.

USE ON

- ▲ Assembly of mechanical parts
- ▲ Lubricating areas of rotation sliding contact, such as cylinders, crank shafts and cam shafts
- ▲ Crank Shafts and Cam Shafts
- ▲ Coating internal engine parts during assembly

- ▲ Minimizes Friction: Reduces friction, galling, and wear on all engine types which can cause damage to engine components on initial start up
 - ▲ Protects engines during those first few seconds of start up after a rebuild
 - ▲ Improves Performance: Ensures optimal performance by maintaining proper lubrication during the initial engine start
- ▲ Suitable for assembling engines
